SIMONE ROMITI

simone.romiti.1994@gmail.com | Webpage | Github | LinkedIn | Orcid

Theoretical physicist specialized in lattice QCD and high-performance computing, with proven expertise in Monte Carlo simulations, Machine Learning (PINNs, VAEs), and code optimization. Track record of developing innovative algorithms that achieved substantial performance improvements, and leading collaborative research projects across international institutions. Passionate about expanding expertise and tackling complex computational challenges in collaborative, interdisciplinary environments.

EDUCATION

Roma Tre University   Rome, Italy
PhD in Theoretical Physics (Dissertation 22 April 2022)   2018 – 2021

- **1st in ranking** for public admission exam to PhD program
- Affiliation with **INFN (Istituto Nazionale di Fisica Nucleare)**
- **Tutorial sessions and teaching assistant** for undergraduate courses

Roma Tre University   Rome, Italy
M.S. in Theoretical Physics of Elementary Particles   2016 – 2018

- **Final grade**: 110/110 *cum laude*, **GPA: 29.85/30**

Roma Tre University   Rome, Italy
B.S. in Physics   2013 – 2016

- **Final grade**: 110/110 *cum laude*, **GPA: 28.84 / 30**
- **Merit Scholarship** awarded for top high school marks and academic excellence.

WORK EXPERIENCE

University of Bern   Apr 2024–Present
Postdoctoral Researcher   Bern, Switzerland

- **Innovative method** using **Physics-Informed Neural Networks (PINNs)** $\rightarrow$ exponential to polynomial scaling of memory
- **Reference scientist** for Hadronic Vacuum Polarization (HVP) analysis of Bern group $\rightarrow$ sub-permille precision achievement
- **Pole contribution** to Hadronic Light-by-Light contribution to $(g-2)_\mu$ $\rightarrow$ achieved N^6 to $N\log(N)$ scaling improvement
- **Main developer** of open-source libraries $\rightarrow$ my code for Monte Carlo simulations led to scientific publications
- **Supervision of PhD students**

University of Bonn   Nov 2021–Mar 2024
Postdoctoral Researcher   Bonn, Germany

- Generated ETMC ensembles with O(a)-improved configurations, enabling more accurate lattice QCD calculations for the European Twisted Mass Collaboration
- **GPU code optimization** $\rightarrow$ achieved ~ 1.5 improvement by auto-tuning of Multigrid parameters
- **Novel method for SU(2) Hamiltonians** $\rightarrow$ achieved machine-precision exactness for canonical commutation relations
- **Monte Carlo and Quantum Computing** $\rightarrow$ obtained Hamiltonian limit and calculations of glueballs spectrum
- **Supervision of 1 Master's and 2 PhD students** of their thesis project, **tutorial sessions of undergraduate courses**

SELECTED PUBLICATIONS

- [SU(N) lattice gauge theories with Physics-Informed Neural Networks](#)
- [The anomalous magnetic moment of the muon in the Standard Model: an update](#)
- [Strange and charm quark contributions to the muon anomalous magnetic moment in lattice QCD with twisted-mass fermions](#)
- [Towards determining the (2+1)-dimensional Quantum Electrodynamics running coupling with Monte Carlo and quantum computing methods](#)
- [Digitizing lattice gauge theories in the magnetic basis: reducing the breaking of the fundamental commutation relations](#)

SKILLS

Programming Languages - C, C++, Python, Bash, R
High-Performance Computing - openMP, MPI, CUDA, GNU/Linux, EasyBuild, SLURM
Frameworks and Libraries - Jupyter, NumPy, SymPy, SciPy, Pandas, Matplotlib, Plotly, PyTorch, Streamlit
Computational Methods - Monte Carlo, Bayesian statistics | Machine Learning (PyTorch): PINNs, VAEs, diffusion models
Tools & DevOps - LaTeX, Markdown, RMarkdown, Quarto, Docker, Git, GitHub Actions
Languages - Italian (native), English (proficient), German (A2.1)

LEADERSHIP & RECOGNITION

Invited speaker at Scale Setting workshop — ECT* | March 2025
Main organizer of Hamiltonian LGTs workshop — ECT* | September 2025
Principal Investigator for 240k GPU node-hours allocation — CSCS (ALPS) | October 2025
Leading organizer of weekly seminars at HISKP department — HISKP | 2022 - 2024
